

I would like to speak out against any new copyprotection on broadcast or cable hdtv programs. For along time now the public has been able to timeshift programs using either vcr or tivo and to cut us off from that ability is unacceptable. The fight over timeshifting has already been fought and won by the public, this is just a continuation of a fight already lost by the broadcasters. Vcr's have never hurt the broadcasters and I beleive that they have in fact helped them. Please please don't take away our ability to timeshift programs or keep copies for our private "fair use".
